NIKHIL DANDOLU

+91 6309872249 | nikhildeshmuk98@gmail.com | LinkedIn | Portfolio

❖ SUMMARY

AI-focused Information Technology graduate with hands-on experience developing intelligent applications using Python, NLP, Transformer-based models, Flask, MySQL, and multimodal AI technologies. Developed AI projects involving script-based recommendation, semantic analysis, conversational AI, voice interaction, document analysis, and image understanding. Strong foundation in Python, data processing, REST APIs, NLP, and AI application development, with a keen interest in LLMs, Agentic AI, RAG, and autonomous AI workflows.

❖ SKILLS

Programming Languages: Python, SQL

Web Technologies: HTML, CSS, JavaScript

Frameworks/ Libraries: Flask,NumPy,

Pandas, Scipy, Matplotlib

Databases: MySQL

Data Science : NumPy, pandas, matplotlib, seaborn, Scipy

Tools & Platforms: Git, GitHub, Microsoft Excel, REST APIs, Visual Studio Code

AI/Machine Learning : NLP, Transformers,CNN, Recommendation Systems

Generative AI : LLM Concepts, Prompt Engineering, Multimodal AI, Conversational AI

Soft Skills: Clear Communication, Teamwork, Analytical Thinking, Time Management

❖ PROFESSIONAL EXPERIENCE

Data Analytics Intern - Aspire Primograd PVT, LTD **June 2025 - July 2025**

- Successfully completed a Data Analytics course, gaining hands-on experience in data analysis, data visualization, and database querying techniques.
- Worked with real-time datasets to analyze, clean, and interpret data for extracting meaningful and actionable insights.
- Implemented Developed practical knowledge of analytical tools and methodologies used to process data efficiently and support data-driven decision-making.

❖ EDUCATION

B.Tech: Information Technology **2022 – 2026**

NBKRIST | Vidyanagar, India

❖ Projects

Deepflix - AI Powered Script-Based Movie & OTT Recommendation System

- Developed an AI-powered recommendation system that analyzes complete movie scripts using NLP and semantic analysis rather than relying only on traditional metadata.
- Applied Transformer-based NLP techniques and CNN-based semantic feature extraction to identify plot structures, emotions, and thematic patterns.
- Generated semantic representations of movie content and used cosine similarity to identify contextually relevant recommendations.
- Designed the system to transform unstructured textual script data into meaningful features for personalized recommendation.

NOVA AI Intelligence Studio – JavaScript , Flask , Mysql

- Developed a Flask-based multimodal AI application supporting conversational interaction, voice input, document analysis, and image understanding.
- Integrated AI/NLP workflows into a web-based application to process different forms of user input and generate intelligent responses.
- Designed real-time interaction features for conversational and multimodal AI experiences.
-

❖ Certifications

- **Privacy and Security in Online Social Media | NPTEL**
- **Business Analysis & Process Management | Coursera**
- **Data Analytics Internship Certification | Aspire Primo Grad**
