PROFESSIONAL SUMMARY

Entry-level Quality Engineer candidate with a B.Tech in Information Technology and a foundation in Python, SQL, MySQL, REST APIs, and data analytics. Completed a Data Analytics internship involving dataset analysis, data cleaning, visualization, and database querying. Built AI-enabled web application projects involving NLP, semantic similarity, document analysis, and interactive user experiences. Interested in applying structured test design, data validation, defect investigation, and regression testing practices to enterprise analytics solutions.

CORE SKILLS

Software Testing: Manual Testing, Functional Testing, Integration Testing

SQL & Data Validation: SQL, Joins, Filters, Aggregations, Data Quality

Programming & Querying: Python, SQL, JavaScript
Databases & Data: MySQL, data cleaning, dataset analysis, data validation fundamentals
Web & Integration: HTML5, CSS3, Flask, REST API concepts
Analytics & AI: ETL/ELT Fundamentals, Data visualization, NLP concepts, transformer models, semantic embeddings, cosine similarity
Tools: Git, GitHub,Jira, Microsoft Excel, Visual Studio Code
Professional: Analytical thinking, attention to detail, communication, teamwork, adaptability, time management

RELEVANT EXPERIENCE

Data Analytics Intern | Aspire Primo Grad Pvt. Ltd. | June 2025 – July 2025

- Analyzed, cleaned, and interpreted real-world datasets to identify patterns and produce actionable insights.
- Gained hands-on experience in data analysis, data visualization, and database querying techniques.
- Applied analytical methods to process data and support data-driven decision-making.
- Relevant to quality engineering: developed a foundation for checking data consistency, investigating unexpected values, and communicating findings.

PROJECTS

Deepflix – AI-Powered Script-Based Movie & OTT Recommendation System

- Developed a recommendation system that analyzes movie scripts rather than relying only on genre-based metadata.
- Used NLP techniques, transformer models, CNN-based semantic embeddings, and cosine similarity to identify thematic relationships.
- Quality-testing relevance: provides a project context for validating input handling, recommendation relevance, and consistency of AI-generated results; these are potential test areas, not claimed formal testing experience.

NOVA AI Intelligence Studio – JavaScript, Flask, MySQL

- Built an AI-enabled web application supporting conversations, voice interaction, document analysis, and image understanding.
- Created a responsive interface using HTML5, CSS3, JavaScript, Flask, and MySQL.
- Integrated AI workflows and real-time interaction features, with attention to application structure and user experience.

EDUCATION

B.Tech, Information Technology | NBKR Institute of Science and Technology (NBKRIST), Vidyanagar 2022 – 2026

CERTIFICATIONS

- Privacy and Security in Online Social Media – NPTEL
- Business Analysis & Process Management – Coursera
- Data Analytics Internship Certification – Aspire Primo Grad
