PROJECTS

DEEPFLIX - AI POWERED MOVIE RECOMMENDATION SYSTEM :-

Developed ***Deepflix***, an AI-powered movie recommendation system using Python and MySQL to provide personalized movie suggestions based on user preferences. Contributed to designing and implementing core application features that enhanced user experience and improved recommendation accuracy. Worked collaboratively with team members throughout the project lifecycle, participating in development, testing, debugging, and deployment while ensuring the successful completion of project objectives.

INTERNSHIPS AND WORK EXPERIENCE

- **DATA ANALYTICS INTERN -ASPIRE PRIMOGRAD** **(June 2025 - July 2025)**

.Completed a Data Analytics Internship at Aspire Primograd Pvt. Ltd., where I worked with real-world datasets to analyze, organize, and interpret data accurately. During the internship, I strengthened my analytical and problem-solving skills by working on practical assignments, collaborated effectively with team members to complete tasks within deadlines, and developed strong attention to detail and documentation skills. I also gained hands-on experience in using Microsoft Excel, SQL, and reporting techniques to support data-driven decision-making.
