NIKHIL DANDOLU

+91 6309872249 | nikhildeshmuk98@gmail.com | LinkedIn | Portfolio

❖ SUMMARY

Aspiring Python Full Stack Developer with a strong foundation in Computer Science -Information Technology skilled in building end-to-end web applications using Python,MySql,Flask,Html,CSS and JavaScript.Passionate about developing scalable solutions and continous improving technical expertise to deliver impactful software application.

❖ SKILLS

Programming Languages: Python, SQL

Web Technologies: HTML, CSS, JavaScript

Frameworks: Flask

Databases: MySQL

Data Science : NumPy, pandas, matplotlib, seaborn, Scipy

Tools & Platforms: Git, GitHub, Microsoft Excel, REST APIs, Visual Studio Code

Soft Skills: Clear Communication, Teamwork, Analytical Thinking, Time Management

❖ PROFESSIONAL EXPERIENCE

Data Analytics Intern - Aspire Primograd PVT, LTD **June 2025 - July 2025**

- Successfully completed a Data Analytics course, gaining hands-on experience in data analysis, data visualization, and database querying techniques.
- Worked with real-time datasets to analyze, clean, and interpret data for extracting meaningful and actionable insights.
- Implemented Developed practical knowledge of analytical tools and methodologies used to process data efficiently and support data-driven decision-making.

❖ EDUCATION

B.Tech: Information Technology **2022 – 2026**

NBKRIST | Vidyanagar, India

❖ Projects

Deepflix - AI Powered Script-Based Movie & OTT Recommendation System

- Developed an AI-driven OTT recommendation system that analyzes complete movie scripts instead of relying solely on genre-based metadata for recommendations.
- Implemented NLP techniques, Transformer models, and CNN-based semantic embedding generation to understand plot structures, emotions, and thematic patterns in scripts.
- Integrated cosine similarity matching to deliver highly personalized content recommendations based on semantic understanding of movies.

NOVA AI Intelligence Studio – JavaScript , Flask , Mysql

- Developed NOVA AI Intelligence Studio, an AI-powered web application supporting real-time intelligent conversations, voice interaction, document analysis, and image understanding using advanced AI/NLP technologies.
- Built a modern and responsive user interface using HTML5, CSS3, JavaScript, Flask, and MySQL with a strong focus on clean architecture, high performance, and seamless user experience.
- Implemented advanced AI integration workflows and real-time interaction systems to deliver scalable, human-like, and immersive multi modal AI experiences across the platform.

❖ Certifications

- **Privacy and Security in Online Social Media | NPTEL**
- **Business Analysis & Process Management | Coursera**
- **Data Analytics Internship Certification | Aspire Primo Grad**
