NIKHIL DANDOLU

+91 6309872249 | nikhildeshmuk98@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Aspiring Database / Backend Developer with a strong foundation in **SQL, MySQL, relational database concepts, Python, Flask, REST APIs, and database-driven application development**. Hands-on project experience with MySQL databases, SQL-based data operations, data analysis, data cleaning, application–database integration, API integration, and technical troubleshooting. Interested in database operations, performance-focused SQL development, database security, automation, monitoring, and reliable data management.

TECHNICAL SKILLS

Database & SQL: SQL, MySQL, Relational Databases, Database Querying, Data Management, Database Integration, SQL-Based Data Analysis

Programming: Python, SQL

Backend Development: Flask, REST APIs, API Integration, Backend Application Development

Database Application Development: MySQL Integration, Database-Driven Applications, Data Operations, Application–Database Connectivity

Data & Analytics: NumPy, pandas, matplotlib, seaborn, SciPy, Data Cleaning, Data Analysis

Security & Troubleshooting: Privacy and Security Fundamentals, Technical Troubleshooting, Problem Solving, Analytical Thinking

Development Tools: Git, GitHub, Visual Studio Code

Web Technologies: HTML5, CSS3, JavaScript

Cloud: AWS

PROFESSIONAL EXPERIENCE

Data Analytics Intern | Aspire Primograd Pvt. Ltd. | June 2025 – July 2025

- Worked with real-world datasets and performed **data cleaning, data analysis, data visualization, and database querying**.
- Used SQL-based data operations to retrieve, analyze, and interpret data for meaningful insights.
- Applied structured data-processing and analytical techniques to improve the quality and usability of datasets.
- Performed data analysis to identify patterns and support **data-driven decision-making**.
- Applied problem-solving and troubleshooting techniques while working with datasets and analytical workflows.

PROJECTS

NOVA AI Intelligence Studio | Flask | Python | JavaScript | MySQL | REST APIs | API Integration

- Developed an AI-powered web application using **Flask and MySQL**, with database-backed application functionality.
- Integrated MySQL database services with the backend to support structured data management and application operations.
- Implemented backend functionality using Flask and REST/API integration for interactive application features.
- Worked with database-driven application components and application–database integration during development and testing.
- Applied technical troubleshooting and problem-solving practices while integrating application components and database functionality.

DEEPFLIX – AI-Powered Script-Based Movie & OTT Recommendation System | Python | SQL/MySQL | NLP | CNN

- Developed an AI-powered recommendation system that processes complete movie scripts to generate personalized movie and OTT recommendations.
- Worked with structured application data and database concepts to support recommendation-system functionality.
- Applied data-processing techniques to prepare and analyze information used by the recommendation workflow.
- Implemented semantic similarity using **cosine similarity** to generate recommendations based on script-level content.
- Applied NLP and CNN-based techniques to extract meaningful information from movie scripts.

EDUCATION

B.Tech – Information Technology | NBKR Institute of Science & Technology, Vidyanagar, India | 2022 – 2026

CERTIFICATIONS

- Privacy and Security in Online Social Media – NPTEL
- Bussiness Analysis & Process Management - Coursera
- Data Analytical Internship Certification - Aspire Primograd Pvt. Ltd
